On the Windows platform, AutoCAD Serial Key, AutoCAD LT, and AutoCAD R14 include a family of APIs, referred to collectively as "ApiDA", that supports customization and automation in the form of Add-in software. Each Add-in application accesses AutoCAD's API in order to add functionality to the program. Geometric Algebra Geometric Algebra (GA) is a programming language for describing spatial relationships and transformations in terms of geometric objects and their algebraic representations. It is analogous to linear algebra. The purpose of GA is to automate spatial transformations in order to perform CAD/CAM operations. These include operations such as: 2D rotation 2D translation 2D/3D combination (mirroring) 2D/3D scaling 3D scaling 2D/3D rotation GA is built on top of 2D and 3D CAD objects. The following transformations are implemented: Angle Angle + Length (arc length) Angle + Direction (directional rotation) Angle + Length + Direction (rotation + arc length) Angle + Direction + Length (unlimited rotation) Direction Direction + Arc Length (directional rotation) Direction + Arc Length + Angle (rotation + arc length + angle) Arc Length Arc Length + Direction (arc length + direction) Arc Length + Direction + Angle (arc length + direction + angle) Direction Direction + Arc Length (directional rotation) Direction + Arc Length + Angle (rotation + arc length + angle) Angle Angle + Direction + Length (angular rotation) Angle + Direction + Length + Arc Length (angular rotation + arc length) Direction + Length Direction + Length + Arc Length (unlimited rotation + arc length) Direction + Arc Length Direction + Arc Length + Angle (direction + arc length + angle) Arc Length Arc Length + Direction (arc length + direction) Arc Length + Direction + Angle (arc length + direction + angle) Direction + Arc Length Direction + Arc Length + Angle (unlimited rotation + arc length) Direction + Arc Length + Angle + Length (unlimited rotation + arc length + angle + length) Direction + Length Direction + Length + Arc Length (unlimited rotation + arc length + angle) Direction + Arc Length + Length (unlimited rotation + arc length + angle + length) Arc Length + Direction Arc a1d647c40b
