I'm using CSS filters on a website to flip the picture. It works on Chrome, but not on Internet Explorer. Here's the code: .flip{ -webkit-filter: flip(y); -moz-filter: flip(y); -o-filter: flip(y); -ms-filter: flip(y); filter: flip(y); -ms-transform: rotate(180deg); -moz-transform: rotate(180deg); -webkit-transform: rotate(180deg); -o-transform: rotate(180deg); transition: -ms-transform 0.6s; -moz-transition: -ms-transform 0.6s; -webkit-transition: -ms-transform 0.6s; -o-transition: -ms-transform 0.6s; transition: transform 0.6s; } I used the Flip effect on a div and it works on Chrome.
