February 9, 2022 - To help you create more digital publications in various styles, Flip PDF Corporate Edition includes more pre-designed templates and scenes. It also allows you to create layouts that have special features in one presentation and use those layouts in others. For example, you can use the same layout to create multiple charts in a presentation. These layouts include many common design elements such as varying text and image sizes, as well as buttons, link boxes, and other elements. You can view and use all these elements in your presentation, and modify them as you wish.
