## Heat Distortion Plugin Crack

[Download](#)

---

**WHAT IS THERMAL DISTORTION:** Thermal distortion is a plugin that simulates realistic heat waves and distortion. Features advanced noise, wind parameters. You can also change the wind speed by adding or removing wind noise. Thermal distortion can be added to a project to simulate a warm, cold, or neutral part of a scene. To do this, in the window Project -> Effects -> Environment and Animation, select the option Environment and Animation -> Environment and Animation Effects -> Heat Wave (Thermal distortion). To set thermal distortion simply drag it onto the stage. As a result, heat waves will appear on the scene.
