What's New in the LojiklSweep?

LojiklSweep is an enterprise backup/recovery tool. It has been designed to fit any task, anywhere... from day one, it has been made to be opened like an envelope and can easily be configured in a way that fits you. Simply plug in what you need to, and LojiklSweep will handle the rest. It will tackle the actual work for you, not trying to do it all.

LojiklSweep Key Features: Flexible Data storage - LojiklSweep has been built from ground up for the needs of the typical enterprise. It uses the best NTFS

volume compression out there, and it stores all data in an internal filesystem dedicated just to that task. LojiklSweep works either for local backups, or for an always online scenario.
