## Movie Selector

The Movie Selector is an easy-to-use application that allows you to view your movies or home videos in a number of different ways, including a simple and fast browser, an intelligent and fully customizable search engine or a file manager. The program is accessible and portable. This download contains a ZIP file of the actual program. After unzipping it and extracting it to your desktop, double-click on the File.exe icon. There you'll find a setup file called Setup\_MovieSelector.exe. Follow the on-screen directions to install and run the program. How does it work? The Movie Selector runs on Microsoft Windows. As soon as the application is installed, it should automatically launch. For any questions, try clicking the 'Help' button on the main screen. What are some examples of use? The following categories describe some of the ways in which you can use the Movie Selector. The Movie Selector as a Smart Browser The Movie Selector can browse through your movies by genre, actor, director, DVD disks, year and IMDB rating. The program has a feature called "The Filter". This allows you to create your own criteria to automatically search the Movie Catalog for movies that match your wishes. When you've finished browsing or search, the program presents you with a list of matching movies. You can click a movie to view the details about it. The resulting list can be moved around and sorted on the fly. After you've finished browsing, simply click the "Exit" button and the program will close. The Movie Selector as an Intelligent Search Engine Use the Movie Selector as a search engine for all your movies and videos. The Search Engine mode works like a normal search engine in that you type the words you're looking for in the search box. The program will search through its database and return movies that match your requirements. Additionally, you can use the drop-down menu to set a number of criteria. For example, if you want to search for movies with a particular actor, you can select it from the menu. Or, you can set up a filter that will return only movies that match a certain category. Using the Movie Selector as a Movie Catalog You can use the Movie Selector as a DVD or CD catalog. Simply click the "Add" button in the file manager to place the movies in your catalog. You can also

### Movie Selector Incl Product Key

- Query the selected IMDB movie using the number of stars or genre. - Search through the entire IMDB database - Watch movie trailers - View movie images - Download movie posters (if available) - Create playlists - Add movies to a catalog - Specify the number of movies to display at once - Database size is estimated to be around 3.5GB (Chromium required) Convert2Flash Description: Convert2Flash is a powerful cross-platform tool to convert video to Flash 10, SWF, FLV and AVI.
