**Windows 10 Firewall Control Free Edition Portable Free**

---

The Windows Firewall Control Free Edition is known to be a convenient and efficient tool to secure your Windows operating system. The feature-packed freeware is a standalone application, but you can make changes on your main firewall in your Windows registry. Windows Firewall Control Free Edition Portable is designed to ensure your computer stays safe and sound from possible issues. The freeware enables you to control both your inbound and outbound security settings. In addition to that, Windows Firewall Control Free Edition Portable enables you to change the default Windows Firewall settings and enable and disable both real-time as well as scheduled tasks. The freeware also allows you to control registry settings, manage the network and block unknown processes and tools. The bundled software provides you with tons of features that will help keep your computer safe and sound. Windows Firewall Control Free Edition Portable has a friendly

---

user interface. The interface is easier to navigate in comparison to the one available on the Windows Firewall Control Deluxe version. The interface is also made available in a portable version. The portable version does not require you to install additional software on your computer. You just need to make copies of required files to your computer, and run them. Windows Firewall Control Free Edition Portable is compatible with all Windows operating systems. It is a standalone application, but you can make changes on your main firewall in your Windows registry. You can also control your Windows Firewall settings by navigating to the ‘Windows Firewall’ option on the ‘Control Panel’.
