You can also add hand-drawn sketches and corrections by “marking up” CAD drawings. Quickly insert new sketches or make corrections in a manner similar to Word. With Markup Assist, you can also digitize scanned text or insert drawings that you can print out. File-Based Clipboard: Clipboard history and searching are now available in the clipboard, so you can easily search for any image, selection, or shape. (video: 1:37 min.) The Clipboard workspace has been removed. This means that “Copy Picture” doesn’t work like it did in previous versions. If you’re pasting an image from the Clipboard, you must insert it into the drawing, then paste it into the drawing. (see update below) You can still paste to your drawing from the clipboard and to the Clipboard by using the shortcut, Ctrl+P. There’s a new search bar, where you can search for an image, file, or selection in your drawing, and then load that selection. The “Paste Picture” feature has been replaced by the new function, Paste Image. You can use the shortcut Ctrl+Alt+I to quickly paste an image from the Clipboard. Copy/Paste commands are now customizable. You can also drag-and-drop images from the desktop into the Clipboard, or the Clipboard into the desktop. You can now choose different default image formats when you paste, including JPG, PNG, GIF, TIFF, and BMP. You can paste a file or image in the format that it was originally saved in. You can specify whether you want the original image format, a scaled version, or an optimized version, when you paste.
