Create a new drawing. Set the drawing properties, such as name, dimensions, etc. Save the drawing. If you want the latest version, download the Autocad 2018 activation key from here. A: You have to use it first. Create a new.RPM file Click on the gears icon on the top right corner of the Autocad windows. Choose Toolbox - activate the Display Toolbox option. A new window will be opened as shown in the below figure, where you need to click on "New" option. Then Choose "Click and run.RPM" from the menu bar as shown below. After this step, the activation code will appear on the screen. Copy the codes and paste it into the installed Autocad's Patch_Active key. Q: gcloud: how to make connection fail I would like to test/learn about the following: In gcloud is there a way to cause the following to fail? gcloud compute instances create test_instance --zone=us-central1-a If the request to the API returns an error status code like 400 or 500 I would like to cause that error to be returned. If the request is not returned the process should have no effect and not cause any downtime on the compute instance. A: Not currently, but you can create custom HTTP requests using Cloud Build. See the documentation here: In the example there, the requests are running in your build's own, isolated network. You can test the outbound requests with gcloud beta run test http --target (or --servicerun. SHARE THIS: On August 14th of last year, I wrote an article about how big video games are (exclusively made by women) and how they don't sell as much as their male counterparts. The article sparked a lot of debate on the "pro" and "anti-women" sites. Many people pointed out that video games are still a male-dominated industry, and how men only play video games. At the same time, some people wanted to make sure that I didn't get offended, so they gave me some fair points to counter

Drawing Templates: To save time and streamline the design process, import a drawing template into a drawing you're working on. Review and track changes made to the template, and revise the content and style as needed. We're proud to announce AutoCAD 2K23 will have significant support for digital devices and the cloud. With an Office 365 subscription or use of Microsoft Active Directory, you can configure your AutoCAD instance to automatically publish, stream, and share your drawings to SharePoint sites and OneDrive, so you can access them anytime, on any device. Your drawings are published to SharePoint sites and OneDrive so that you can collaborate with your clients and team members in real time, and quickly share your latest work to clients, team members, and customers. With this new capability, you can easily create and share an interactive drawing on your desktop and access it on a smartphone, tablet, or laptop. The drawing and interactivity are automatically stored in the cloud. AutoCAD data is stored in the cloud, so your data and your company's data are safe and can be accessed from anywhere on any device with an Internet connection. AutoCAD 2K23 and 1.2 update: Save designs on mobile devices: Take AutoCAD drawings on your mobile device, and connect to the cloud, so you can work with CAD files on your computer, tablet, or smartphone. You can view and edit drawings stored on a SharePoint site and OneDrive. Mobile use: It's easy to connect to a SharePoint site and OneDrive from your mobile device. You can view, change, and edit AutoCAD files stored in the cloud. Create new and edit existing drawings on mobile devices: To publish, stream, and share drawings stored in the cloud, you'll need to first sign in to a SharePoint site or OneDrive. You can then create a drawing from scratch or open an existing drawing stored in SharePoint or OneDrive. To start editing a drawing stored on the cloud, open the Edit dialog box and choose Publish to the cloud from the drop-down menu. The Publish dialog box displays a link that you can send to others. To send your file to the cloud, click on the link. Streamline your CAD workflow: Publish to the cloud from other drawing applications:
