The world of the Forests Between

The lands across the oceans are a peaceful and quiet land. Mankind has been here for a long time. Its society is so peaceful that those living there are unaware of the dangers of the outside world. However, the lands across the oceans have one big problem: there are monsters spilling over from the outside that eat their inhabitants! These precious people desperately need help.

These lands slowly but surely turn into a dreadful location in which the monsters are always first. The one who is first must win to take charge of the peaceful world.

Traits of the Monsters

There are many different races of monsters spreading across the lands across the oceans. In this great forest,

- The Mafu A race of people that utilizes the elements in their everyday lives. They use magic and high-performance technology to live.
- The Hyakuno A race of people that focuses on communication and cooperation. They use magic to prepare healthy and delicious meals.
- The Dacussi A race of people that use a tangle of points to guide their steps. They mainly master the art of running.

A Story of Adventure & Puzzles

In the midst of a forgotten era where monsters have taken over the world, a hero appears with a fantastic weapon. A fantastic weapon that is so powerful and

Q: Replace some characters in CMD Hello and thanks in advance. I would like to replace some " and/or '/' characters in the string between characters, but I don't know how to do it in CMD. For example: 1) My string is C:\tools\Programa Tt\ I would like that it replaces the " character by "\" and the ' character by "" or something similar. 2) My string is C:/tools\Programa Tt\ I would like that it replaces " by "\" and ' by "" or something similar. 3) My string is \tools\Programa Tt\ I would like that it keeps them as " but it replaces the " by "\" and the ' by "" or something similar. I have seen things like ^\.(something) but I don't know how to use it. I'm using the batch file to a text file. Can you help me? Thank you. A: example: Assume the following command: findstr /r "\\tools\\Programa Tt*" "c:\example.txt" If the string you want to search will change you can use the FOR command in the following way: (findstr /r /c:"\\tools\\Programa Tt\" "c:\example.txt") | findstr /R "\" If your string is shared you may want to use the RegEx object, just to make your life a little easier: For Windows PowerShell Version 3 it is like this: Get-Content C:\example.txt | ForEach-Object { \$_ -replace "\\","\" } For Windows PowerShell Version 2 it is like this: Get-Content C:\example.txt | ForEach-Object { \$_ -replace "\\\","\" } Q: Set blue background to all the rows in datagrid after adding to observablecollection I have a observable collection
