Elden Ring (Updated 2022)

PLAYERS REACTIONS ELDEN RING game: UPDATE! I chose a different title, so please excuse the change. A: I think this is going to be the best fantasy RPG in recent memory. The game design is very enjoyable so far, with multiple big dungeons serving as hubs and a very interesting world that has great exploration. The graphics are top notch as well and the full voice acting is a welcome addition. The online support seems to be pretty good, while the game's price is a bit hard to swallow. Overall though I highly recommend this game. Q: Javascript Function Display Bug I have this really annoying bug that I cant seem to fix. It's with a function called from an onclick event on a button. The function seems to be displaying buggy and I can't understand why. The bug only occurs when using the function onclick event, and works just fine if I use the click event for this button (doesn't show the alert even though the function executes). Here is a simple version of what I'm doing: function DisplayAlert(){ var a; a = prompt("Message"); if(a == true) return true; else return false; } Thanks in advance for the help. A: Inside the inline event handler you are trying to access a global variable outside of bff6bb2d33
