**Fast Hide IP Crack With Serial Key X64 [2022-Latest]**

Fast Hide IP is a useful program that helps you browse the Internet anonymously by encrypting your data through proxy servers located all over the world. Fast Hide IP is a program that helps you keep your real address to yourself, protecting you from identity theft or tracking efforts. Download Fast Hide IP Portable Download Fast Hide IP review: Fast Hide IP is a useful application that ensures anonymity while browsing the Internet, protecting your identity from theft and your browsing habits from tracking attempts. Being a global IP changer, Fast Hide IP solves a great

---

deal of problems related to the way you travel the Internet. Relying on your real IP address can turn you into a victim of numerous hackers or tracking agencies that threaten your privacy. Moreover, certain area limitations will prevent you from watching an abroad TV series or from accessing certain videos on YouTube, for instance. Fortunately, this major discomfort can be set aside with software such as Fast Hide IP. Fast Hide IP manages to accomplish its purpose by encrypting Internet traffic; this is done via a set of proxy servers located around the world, which facilitate Internet access via a secure IP address. In other words,

---

during the time a connection is active, your real IP address will be hidden and replaced by a fake one, which will prevent anyone from seeing your true identity. Seeing as Fast Hide IP isn't the only software of this type in the market, the question of what's it got to offer extra is definitely justified. The answer is mostly related to speed and ease of use. Unlike similar software, Fast Hide IP allows users to switch between their real IP address and the fake one very fast, as the connections are being performed more rapidly. Furthermore, switching between the proxy servers is done just as fast, resulting in very short waiting

---

responses. This was also proven during our tests, which showed better, more accelerated connection times compared to similar solutions. Another feature that is less common in its software category is the possibility to set the VPN connection active only for a predefined list of applications. The Options window is where this scenario can be tailored to meet your needs. The general impression is that Fast Hide IP is a reliable choice, made to accomplish online anonymity through speedy proxy connections. Fast Hide IP

**What's New in the?**

Compact design, high level of configuration options, and much more... Fast Hide IP is a software solution for anonymous internet browsing and private online activity. Simply speaking, this powerful application is able to protect your Internet activity from being recorded and tracked. Furthermore, it is able to browse through websites, watch videos or TV series, download files and engage in other private activity without concern that your true

---

identity will be exposed by cyber criminals or internet tracking agencies. This application is able to complete its task thanks to the fact that it will change your IP address with a bogus one, so no one will be able to know who you are or what you do on the Internet. Fast Hide IP is very easy to use. The only thing to be done is to install and activate the software, after that connect to an account (hosting). During the configuration of this application, users will have the possibility to change their IP address, blocking certain websites or specific domain names. Additionally, Fast Hide IP is also able to change the DNS server.

FAQ: Q: What is a Proxy Server? A:

---

Proxy server is a kind of machine in which you can do certain activities that would normally be impossible with your real IP. Q: How Does VPN Work? A: Connect to Internet through a VPN (Virtual Private Network), by means of some secure connection that let you access the Internet anonymously. Q: How to Block a Website? A: You just need to find the website you want to block and add it to a list. Make sure to tick the option which says to block the site on the main window. Q: How to Change DNS Server? A: First you need to connect the VPN network, change the DNS server settings and, after that, connect back to your modem. Q: How to

---

change the IP Address? A: First you need to connect the VPN network, then click on 'Changes IP' and enter your new IP address. Features Fast Hide IP is an easy-to-use and quite powerful application that is able to provide a complete level of anonymity while browsing the Internet. This software will help you to change your IP address with a fake one, which will hide your real IP address from everyone. It will allow you to connect through proxy servers located around the globe, which will facilitate online connection via secure IP address.

---
