## **What's new in Fifa 22:**

- **New camera angles:** in FIFA, using player movement data can see more detail from angles that weren't previously available. This includes the ability to see defenders just below the player when on the floor. In Women's World Cup mode, fans can see player movement starting from the moment a shot is taken.
- **Advanced Catching:** in FIFA 22, with more data from 22 real-life players, you can improve your ability to make the correct decisions during goalkeeping. For example, fingertips now show exactly which part of the ball the player must control.
- **Playmaker:** visualize your opponent's changes of possession - take control of passing and stopping and freeze your defensive and offensive lines just in time.
- **Face of the World:** redefine your favourite football environment by changing the landscape with the touch of a button. Create flat stadium surfaces, or add in solar panels to make it sunnier, snowier, or at altitude.
- **Matchday AI:** keep an eye on your players' movements from multiple camera angles when in possession, and make smarter decisions when your opponents are on the counter.
- **AI-controlled multiple tactics:** your opponents will adapt to the way you play by selecting and executing multiple tactics. For example, during high intensity matches or in tournaments, your opponent could go for possession or switch-flips to get the ball out of penalty areas and into wide areas.
- **Prepare for a new season - pick your favourite team and decide how you want to organise and run that team in 22 FIFA Themes with the all-**
