responsible for the maintenance of homeostasis. So far, proteomics has analyzed both ovarian endometriosis and endometrial endometriosis. The results obtained using proteomics to study endometriosis are summarized in the following article. Proteomics may be useful in elucidating the

a mine exploded. He

There are no job opportunities. There is no money. The people standing next to me are taking videos of the event. I am very uncomfortable with this. I am nervous that someone

will take a picture of me. There are no non-Jews in sight. I stick my head into the event. There are many Palestinians seated. They're laughing. They look happy. They invite me to the area where another mine has exploded. It's not far. They inform me that it was illegal to detonate the mine. They are embarrassed. There is no security. It's not just

Israel. No one knows what is happening next to them. And this is only a sample of what is going on in the world. I leave this event and walk through the streets. There is electricity, but no running water. Can one call it a town? Yesterday, as part of a series of events to commemorate the 70th anniversary of the Nakba, a poem called “The Land of Hummus”

The isolated perfused

lung can be a valuable model for study of metabolic and respiratory activities in the intact organ. The technique of compensating pulmonary ventilation in the isolated perfused lung has been developed for estimation of transfer coefficient between pulmonary capillary blood and alveolar fluid in the isolated lung (Nelson S. C., J. Appl. Physiol., 1971,

32: 1143). The ventilation rate can be accurately measured during pulmonary vasoconstriction and lung hypoxia by observing the pressure changes in the perfusion line of the isolated lung.

surnamesQ: How do I
avoid a race condition
when unpacking the
default value to an
Optional? This is as much

a Scala question as it is one about thread safety. I'd like to write a method that reads an optional value from a map, or from the value in a tuple, in such a way that if the value is not present, I'll throw an exception. (E.g., I need something that looks like this: `def optionalFromStringFromOptionalMap[A](optionalMap: Option[Map[String, String]])`
