The best bit about BATS is that it's just as fun now as it was when we first coded it. We've kept to the original design vision and included all of our fun elements from the original. But we've also made a lot of improvements, and we're super excited about it! We've managed to add a fourth speedrun mode called "Boss Rush", where players can earn extra blood and stars for completing the game as fast as possible. In the regular campaign, players choose the order in which they play the levels, but when playing boss rush they have to complete all five levels in any order. If

---

players don't die, they'll be rewarded with extra blood to unlock the next character. We hope this will give all players a chance to make it to the end of the game and experience our best blood explosion yet! We've

also changed some of the power-ups to be more gameplay friendly. We've given the players a handy map of the level, which lets them know exactly where to go and what they need to collect. And we've made tons of enhancements to the blood making system, so blood spewing all over the place is a more fun, more realistic experience. To celebrate the release of BATS,

we've released BATS in a free in-app upgrade for everyone! We hope you'll enjoy the new features!

## **What's new in Vagabond Starship:**

." (Here it has also been called the Devil's Stone, the Luck-stone, the Jewel belonging to a certain belief of the Italians, and the Stone of Luck.) Von Hammer-Purgstall counted on every occasion: "One of the most remarkable statements concerning the human being's connection with immaterial beings can be found in the game that people play with evil spirits. To say that through certain rules you can call to the devil to take them to the Land of the Dead and make them suffer the cruelties and ignominy there is already a great deal of absurd superstition and devil worship; but the manner and style of the game show that this whole manufacture is nothing but a fool's illusion of ignorant people who are forced to prove their struggle against the devil." The devil himself has made such trivial charades and dancing tricks and marvellously charming toned-down follies to fire our imagination and sweep it away with laughter; the devil himself has fancied and laughed himself in a cheerful manner at these delirious tomfooleries. In my opinion this laughing at devilry is the highest tribute one person can render another—and St. Martin's day means just that. But if this is the consolation of those afflicted with the defect of superstition, the attitude that judges like an onlooker, outwardly the same but inwardly far removed, while silently he marvelling at his conscious superiority, how gladly the bad man would exchange his wickedness with such a calm inward understanding! How gladly he would be spared the tears of his soul! How long will he let himself be deceived by devilish tricks? Shall he be so easily gulled? Must he always be wanted, under every lamp post and in every corner, in every masquerade and theatre of the devil? Verily he lacks here a trusty guide. Sometimes I ask myself whether I myself would still be here at this time if I had the devil's trumpery philosophy. Shall I exchange the devil of the miserable, wretched supplicants for the devil of the evil conscience! And the answer is: Never. And yet, how many suffer from their crooked conscience while murmuring at it and trying to correct it!

There are 8 categories of Actions and Events that can be performed in Overal, that are executed according to the player's Opinions. In the same way, the player can place a Loan or a Bond to any category.

Depending on the action performed on the given category, the player can get an Advancement on the corresponding category. The player can also own a total of 3 Profiles, and try to develop them through improving their Opinions, but taking care to respect the limits of the global budget. Since at any time the player can decide the chance to add to the development of the Profiles, there is no direct improvement of one's current Profiles. In order to initiate a profile development it is necessary to have at least the minimum development of the profiles. The global budget and the bank balance are always available to the player, and can be modified at any time. .Overal + Month Development can be altered in every month . Altering the development of any category also alters the development of the others. + Actions & Events + Advancements . Actions and events are usually taken place every month and can be executed only once a year. The 4 the pure actions are: Meet, Agree, Reform and Segregate. The 7 the mixed actions are: Loan, Bond, Segregate, Segregation, Imprint, Study & Analyse and Conspire. Each action has its own benefit and reward. Each month a special event can take place, that may affect

---

the actions of the upcoming month, until the month expires. The events are: The Promotion, the Conspiracies, the Accusation, the Popularity and the Fascination. After the chosen action and the event has been performed, there is a chance that the player is going to get an influence to the next action in its turn. For example, the action Reform can result in a mixed action of Loan & Bond. The player should choose both one that he wants to perform during the current month. In case the player does not use both actions but only one, a negative effect will be produced in its turn. A general rule, that covers any development of a category, is that: - each category has a maximum development - for every action the category's development cannot be increased, but only the action's effect can. Actions & Events in Overal +
