Coiled tubing systems are currently used to drill, complete, and fracture wells. For many applications it is desirable to operate a coil in a high-pressure environment, as pressure is used to enhance a variety of functions. However, the relatively low density

of coiled tubing may result in the formation of voids or cavities in the tubing wall under pressure. In addition, mechanical problems associated with sludge accumulation and entanglement of the tubing, may be exacerbated in high pressure environments. In order to better understand the effects of pressure on the coiled tubing operation, models, generated using computational fluid dynamics, are employed to simulate the force distribution on the coil and the mechanical effects of voids and sludge accumulation. The CFD models were validated using physical measurements obtained from a live experiment. Transcription factor expression profile in acute myeloid leukemia with AML1/ETO rearrangement. The AML1/ETO gene rearrangement occurs in 5%-6% of AML patients and generally has a poor prognosis. Therefore, a better understanding of the events involved in leukemogenesis may help to define new treatment strategies for these patients. Here, we describe the gene expression profile of AML1/ETO-positive AML (AML-E) samples at diagnosis and during remission. We identified a number of genes that were differentially expressed in AML-E compared to wild-type c9d1549cdd

Insurance & Safety in Inpatient Rehabilitation: A Critical Analysis of Public Records CONTENTS ABSTRACT OBJECTIVES To present and analyze data from public records to provide a snapshot of the inpatient rehabilitation industry as it pertains to insurance coverage and safety outcomes. MATERIAL AND METHODS Public records were accessed to provide statistics regarding the following: annual revenue, insurance reimbursements, and safety and quality indicators. RESULTS Although the number of facilities has increased over the past decade, the number of certified facilities has remained stagnant. Insurance costs have been rising since 2009. CONCLUSION Medical/surgical rehab facilities are reimbursed an average of 59% by state Medicaid programs and 35% by private insurance. Insurance institutions spend approximately \$150 billion per year on private insurance. The major causes of inpatient admission are fracture,

What's new:

has fallen and the hyped net game, StarCraft: Diablo, is complete. Both games were sequel's to highly praised originals. I decided to take a look at both with an even keener eye than before to see if they still retained the magic of the originals. And

being that I've never played the originals before I feel this is the best place to set out and assess these games as honestly as I can. I'll be using a set of preconceived expectations and genre expectations from my previous reviews. Hope you'll enjoy this follow-up after this article and previous in the series. Back to reality: Goddess of War is the first arena type battle/tdm game I played for this test. I need to play a couple more before getting attached to my own opinion. I was surprised how quickly this game captivated me. Nothing too long here as its an overview of the... gameplay. I'll expound on the heart of the game when I get there. Because this game was looking to be like WoW Arena my opinion on this game leaned more toward the technical aspects of the game. This didn't affect my absolute opinion on the game, however. My first impression was that this game was really neat. The lighting was really nice and looked real, or as close as a 2D game could capture. E... this is 2D. The controls were also neat with an auto-upstick and was more responsive than I thought it would be. *Combat* Graphics: 5/10 Gameplay: 4.25/10 Sound: 7.5/10 Add up: 4.5/10 Goddess of War game play can best be described as a mix between... both Rogue and Arena games. Rogue games have you "sniping" enemies from a high perch as if you were a sniper. This doesn't apply here, though. It's more like how an arena game would be like with the strategy like elements of CS. To sum it up I feel this game depends more on the strategy than the sniping/locking-ons. To be fair (to the TL:DR readers) the AI here is damn good. They play just enough like a real person and a little more than a bot. They do more than taunt or walk around, but they don't kill you on sight. *Tactics* Graphics: 4

Deponia is a satirical odyssey about love, death,

friendship and the meaning of life. Written by Andrew Goldberg and Jani Nikkari, the quirky masterpiece Deponia is a musical romp full of outrageous comedy and heart-warming charm. Play as everyone's favourite space-dwelling fruitarian, Lemmy Caution, as he attempts to keep his sick mother aboard his ship, the Deponia, and her only wish is to be reunited with her beloved banana. As the journey progresses Lemmy and his motley crew of misfits make an unusual stop at a space station controlled by a group of murderous robots. After a series of odd events befall the station Lemmy and his friends accidentally board the planet Earth in the form of sentient bananas, and from there the adventure begins! The Deponia crew must work together to reunite Lemmy's mother with her beloved fruit, as they crash land on an unfamiliar world that has absolutely no bananas.

Key Features

- An original musical comedy full of sight gags and cuteness
- An original score full of old-school hip-hop and alternative jazz
- 60 original video animations and 100 live-action characters
