Q: (IOS) How to show different fragment according to the ViewController on Swift Currently i am using a NavController to create a left-right navigation between ViewControllers. I was looking for a different navigation approach. First idea I have been working on is to implement a TabController. My question is how to link the ViewControllers on the TabPages. Below is my expected output for the scenario. For ViewController 1, this is how I have set up for the left-right nav: ViewController2 and ViewController3 are the two activities for this ViewController For ViewController 2, this is how it looks like on the left: As you can see, I want to have a different layout for both the ViewControllers. I was wondering if there is an easier way of doing this. Any help will be appreciated. Thanks A: I have no experience with the use of TabController in IOS. If you want to know what is better between TabController and Navigation controller, check this answer: Which approach should I use in iOS to display Tabbed content? if(request == null) { if(cfg_has_cfg_value(COSINE_SOURCE_REQUEST_FORMAT_KEY, VENDOR_COSINE_REQUEST_FORMAT_KEY)) { request = COSINE_REQUEST_FORMAT_KEY.equals(VENDOR_COSINE_REQUEST_FORMAT_KEY) ? requestVersion : COSINE_V2_REQUEST_FORMAT_KEY.equals(VENDOR_COSINE_REQUEST_FORMAT_KEY) ? requestVersionV2 : request;
