From the menu bar click File --> New. Then select Autocad from the drop-down list. Click OK. Change the file name and click OK. In the opened folder change the path of the auto-export-panel.png file to one that suits your computer. Download the Icon from this page (is not mandatory) First click on Download Icon or if it don't work select the icon and drag and drop it into the autocad window. How to install the new version Open Autocad and go to the File menu. Click on Install and then follow the instructions. Then go to Preferences (in the preferences menu). Click on App Data, on Install Package and follow the instructions. The icon is generated from the PNG image and doesn't have to be the same as the old icon. In the new icon we see that a lever is visible (old was horizontal). In the palette we can see that the colors are red and blue. So the new icon will look like this: How to replace the old icon Drag the new icon to the old icon and select Replace to use the new icon Documentation Autocad Modeling (For use with AutoCAD or AutoCAD LT) This section of the Autodesk CAD Library is for the use of AutoCAD Modeling. What's New In?

Block, Fill, and Color The color of Fill In Spans and the color of a text object's background are now separate and editable properties. New properties for enhancing AutoCAD's drawing and design experience Paint fills in Closed Shapes, allowing you to select objects and paint a fill that is automatically applied to the filled shape. You can also create a mask that matches any other fill, and add text objects to a closed shape to increase legibility. Scaling: Readjust the scale of any object to more accurately represent the object's physical dimensions. Locking and Unlocking Use Locking to lock the entire drawing, or any individual group of objects, to keep the drawing from being accidentally modified. Unlock all objects or individual objects to modify the drawing. (video: 1:38 min.) To ensure your drawings are always ready to use, create and save drawings with Layout Sets. Multi-Dimensional The Dimension AutoCorrect Tools in the Interactive Environment dialog box are expanded to include the option to access other types of AutoCorrect Tools. (video: 1:35 min.) Auto-scroll Documents Now, you can turn on auto-scroll in a document with a single click. Object Tracking A link is created between two object tracking points so that you can move one object and move the other with the tracking points connected. Dropzone: Make multi-page drawings easy to use, with support for Dropzone, the PDF component of the new AutoCAD Cloud. You can automatically pull a range of objects from multiple documents and place them all on one drawing page. Define Window Position Preview from any point within a drawing, instantly, with a single click. Advanced Expression Editor: A new Expression Editor is available for drawing expressions. The editor expands a dynamic formatting tool to allow for more flexibility. This new Expression Editor also supports different break and concatenate functions and displays expression results in a different order than AutoCAD

displays results. (video: 2:28 min.) Design Extension and UI Optimization: Data analysis using autodetection and logic-based drafting has improved design extension capabilities and general experience. Design time is reduced. New objects are more easily added to an existing drawing. Interface has been optimized to increase precision
