NnDCIM Crack PC/Windows

----- nnDCIM is a handy and reliable utility designed to automatically transfer photos from removable devices to your computer. nnDCIM is able to recognize devices such as phones, memory cards and cameras. As soon as you plugin the device, the program starts copying the media files. nnDCIM Questions & Answers: ----- Q: How can I do that? A: Just follow the steps below. Q: Why do I have to allow you to access my computer and my photos/movies/music/backup copies of photos/movies/music/backup copies of my photos and movies/etc? A: This is the way the program is designed. The program is able to recognize devices such as phones, memory cards and cameras. As soon as you plugin the device, the program starts copying the media files. You can in this way add media files to your PC by saving or copying them to the program's folder. nnDCIM can then transfer the media files to your PC in two ways: directly by attaching the removable device to your computer (by inserting the device in the computer) or through a network-connection. nnDCIM Features: ----- - Transfer photos, music, movie, documents from your phone, mobile phone, SD card to your PC. - Support high-speed connection. - Support both MTP/PTP/Media Transfer Protocol (M2TS, MP4, M4V) and Windows Media Transfer Protocol (WMA, WAV, AMR). - Support cameras and SD card. - Extract photos from memory card. - Export photos from memory card to folder, image viewer, e-mail or to the phone. - Import photos from the folder, image viewer, e-mail. - View photos in folder, image viewer or e-mail. - Support both SMB/Network/SSH and FTP/FTPS/MTP/PTP. - Support deleting and editing the media files on removable device. - Support for Windows 7/8/10. - Support all 32bit/64bit Windows. - No any risks to your phone, SD card and computer, does not consume your phone's battery. - Extract photos from Android device. - Import photos from Android device to PC. - View photos in PC or Android device. - Support Sony Ericsson and Blackberry phones. -
