# Data Doctor Recovery Sim Card 4.4.1.2

Crack.epubQ: Parsing a number of json objects with Gson in C# I have a JSON with a bunch of items, and i would like to parse that JSON and load those items in my data base. These items have some unique

---

attributes (ex. 'small', 'big', 'correct', 'invalid') and i would like to load those attributes in my data base. i am trying to do it with Gson, however i cant seem to figure out a good solution. here is an example of my JSON

```
[{"Attributs": "Big", "Name": "name 1", "value": 42}, {"Attributs": "Small", "Name": "name 2", "value": 2
```

---

```
4}, {"Attributs": "Correct", "Name": "name 3", "value": 65}, {"Attributs": "Invalid", "Name": "name 4", "value": 31}] note that there are more json objects inside that root object. and here is how i do that Gson gson = new Gson(); JsonElement jElement = gson.fromJson(jsonText, JsonElement.class);
```

---

```
JSONArray itemsArray = j
Element.getAsJSONArray(
); foreach (JsonObject
itemJson in itemsArray)
{ string attributeName
= itemJson.get("Attribut
s").getAsString(); int
value = itemJson.get("v
alue").getAsInt(); string
attributeType = itemJso
n.get("Attributs").getAsS
tring(); string
attributeNameString = it
```

---

```
emjson.get("Name").get  
    AsString(); string  
attributeValue = itemjso  
n.get("value").getAsStri  
ng(); } i am running into  
a few problems i dont  
know how to treat the  
"Attribute" and the  
"Attributs" i would like  
to get rid of some of the  
code and make that a  
common method that i  
can call inside my
```

---

controller, in case i have to parse this JSON with other attributes. for example

```
JsonElement jElement = gson.fromJson(jsonText, JsonElement.class);  
JsonArray itemsArray = jElement.getAsJsonArray();  
and iterate over the itemsArray, and do something like  
6d1f23a050
```
