The problem is that when I try to open a file (a MS Word file on this machine in this case) using the iPhone's default word editing app, I keep getting "can't open file". I've looked at this link: unable to download file to iTunes on Mac but unfortunately it does not mention any potential way around this issue. I also tried using a PC, which yields the same result. I was able to open the file using a different word editing app (One Note), but I need to be able to do so using the default editing app. A: 6d1f23a050
