Click the "Proceed" button to view instructions. Microsoft has released an update to Windows 8 that's designed to improve the longevity of your PC and get a bit of a speed boost. Microsoft's Windows 8.1 Update 1 is now available for download -- a free, optional update that can be installed without a restart. Microsoft's first major Windows 8 update is focused on improving boot times and removing the need for the computer to be plugged in while it's performing updates. This update is advertised in the Windows 8 update page as "Better Boot and Faster Updates" but it also includes a major change to how the operating system handles updates. Previously, when you updated Windows 8, it would remove your current update and install the new patch. That's no longer the case. Windows 8.1 Update 1 no longer requires the computer to be powered off while updating. This patch also kills multiple bugs. Last month, Microsoft released Windows 8.1 Update 1, which introduced a few new features like the ability to hide the Charms and the Settings app. It also included a new Start screen (the tile interface) and a new app called Action Center. Just a few weeks later, Microsoft is releasing an optional update to Windows 8.1, which will include major changes to how Windows 8 updates. It will no longer need to be fully powered down to install, and it's automatically downloading and installing now. While Windows 8.1 Update 1 is optional and you can opt to install it later, you should install it as soon as it's available. This will ensure you get the latest patches and fixes. On Windows 8.1 Update 1, you will notice a new tile on your Start screen named "Windows Update". Microsoft Windows 8.1 is the latest version of the operating system. Even though it is available for free, users can still upgrade to the latest version of Windows 8.1 for free when the update is available for their particular Windows 8 system. This update offers. Windows 8.1, while being very similar to Windows 8, is a major upgrade to the operating system for Windows 8. However, in some areas, including boot time and user interface, Windows 8.1 is not as much of an improvement over Windows 8 as Microsoft claims. Some upgrades include the following:

Microsoft Windows 8.1 is the latest version of the operating system. Even though it is available for free, users can still upgrade to the latest version of Windows 8.1
