Some food is good for health and other is not, because we cannot see or measure chemical in it. A lot of useless junk food is in foods like: Crispy fried foods Hotdog Bottled drinks (like soda) Rice cakes Chocolate cake (like blue marble cakes and chocolate cake) That's why you need a food scale to tell you the truth. I have made bread for years, so I know most of the time I use the bread scales. I also use it for other food like rice cakes, bread, and rolls. So it is time to review bread scales are. I tried to find out about the bread scales, because when I saw my old scale, I still use it. Bread scales use sensitivity ratio that let them to measure weight variation. I was interested about bread scales in 3 different size Small Bread Scale : It is little in size. You can use it to measure bread and rolls. Average Bread Scale : Bread scales with traditional design, easy to use and durable. It can measure both dry and wet weights. It is used to measure bread and rolls. Large Bread Scale : Large bread scales can measure 10 pounds to 100 pounds. Bread scales should have a good warranty with sufficient power. Bread scales don't weigh much, so they can move and hit each other. They are easy to move with good warranty. But, not all is good. I sometimes found out that the bread scales isn
