If the fps is low, try playing other games. Also I know that I have windows 10 on my Asus laptop. I haven't had any issues up to this point, but now this is a game that I want to play just like I do on medium or above medium settings. Please help me fix this? I would be very grateful. But how? I don't quite understand how should I do this?

Field of the Invention The present invention relates to an ink jet recording apparatus that includes a pressurizing container for storing ink, and a flexible porous member arranged in the pressurizing container. 2. Description of the Related Art Conventional ink jet recording apparatuses include a pressurizing container for storing ink, a waste ink container, and an ink supply port for introducing ink from the pressurizing container to an ink supply passage provided in the recording apparatus. Typically, the pressurizing container is formed of a plastic material in order to cope with various storage conditions and fluctuations in ink viscosity as well as so that it is light in weight and inexpensive. However, since the pressurizing container is generally formed of a plastic material, the volume thereof may vary, depending upon the shape of the pressurizing container. Moreover, when the ink in the pressurizing container has low viscosity, the ink is apt to leak from an upper opening of the pressurizing container. An example of ink jet recording apparatus that overcomes these problems is disclosed in U.S. Pat. No. 4,973,120. This apparatus includes a pressurizing container made of a synthetic resin film and a cap member that covers the upper opening of the pressurizing container. The pressurizing container is formed to have a substantially square shape. The cap member is provided with a porous member that receives ink from the pressurizing container and a pressurizing member that presses the porous member and the pressurizing container together. Ink inside the pressurizing container is guided into an ink supply passage by virtue of the porous member, and is supplied to a recording head of the apparatus. However, in the above described ink jet recording apparatus, it is difficult to maintain the quantity of ink in the pressurizing container constant, because the upper opening of the pressurizing container is covered by the cap member.
